

II Application and Enrollment Procedures with the Online Application System

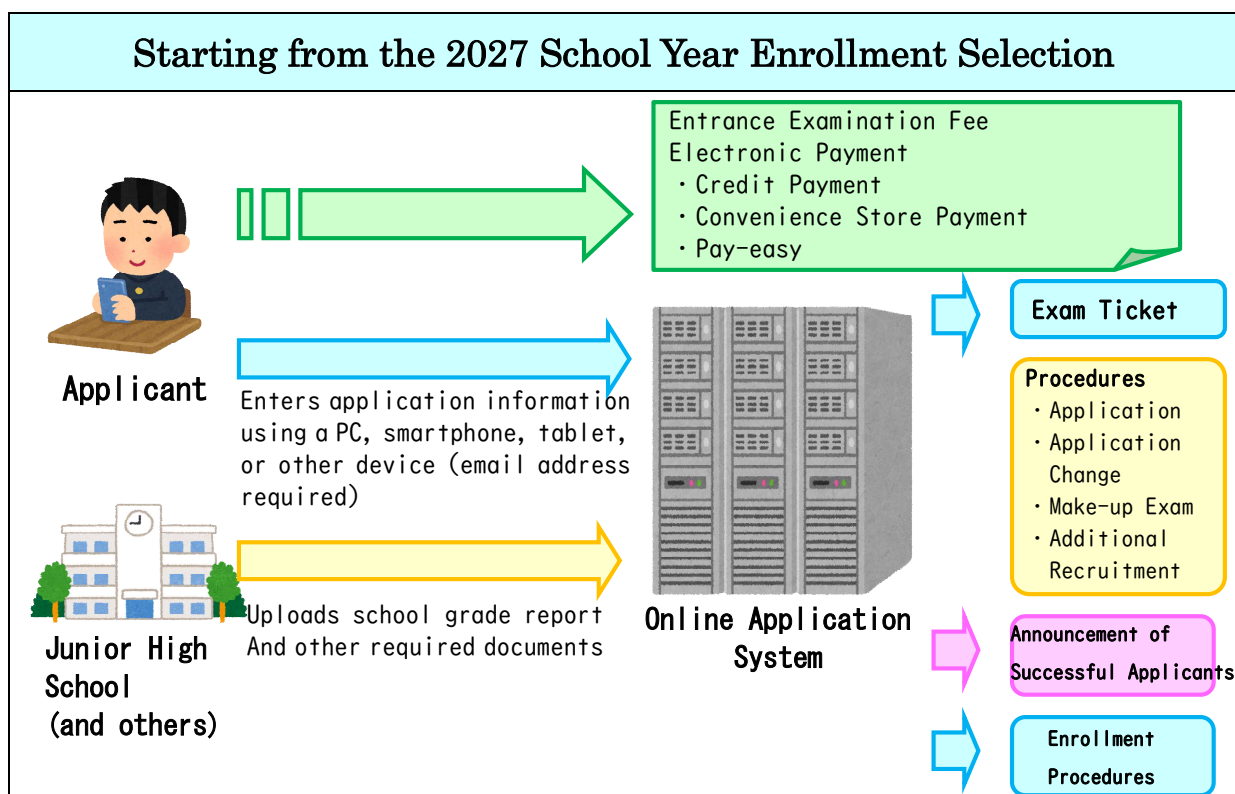

Until now, as part of the application process for enrollment selection, junior high schools would bring application documents such as the enrollment application to each high school directly.

Starting from the selection for the 2027 school year, the application procedure for all applicants (*1) will be carried out through the online application system. Applicants will enter their basic information (such as home address and full name) and their application information (such as the high school and track they are applying to), and the junior high school will upload the information for the applicant's school grade report and other necessary documents. The entrance examination fee will also be paid electronically through the online application system.

Some enrollment procedures for successful applicants to each high school will also be carried out through the online application system, including entering answers to enrollment questions and filling out and uploading required items for submission documents. (*2)

(*1) Not including applicants for credit-based part-time courses in the autumn selection, credit-based distance-learning courses, or the advanced track at Yaizu Suisan Prefectural High School.

(*2) The details for the online application system procedures differ for each high school. Successful applicants will be provided direction from the high school they applied to.

Timeline for Online Application System Procedures
