

III Regarding Selection for Foreign Students

1 Overview of Application Eligibility

Those with foreign nationalities who have continually lived in Japan with their guardians after entering the country in April 2023 or later are eligible. Those that entered the country just before April 2023 may also have their application eligibility approved by the high school education department. However, those that entered the country before April 2023 must contact the principal of the school they wish to apply to in advance for confirmation of their application eligibility.

2 Selection Methods

Selection will be based on a comprehensive review of a school grade report, an evaluation of basic Japanese ability (including questions that measure basic academic ability), an interview, and findings related to Japanese ability and adaptation to matters such as school life. Additionally, for those applying to the Art track at Hamamatsu Enoshima High School, there will also be a practical examination.

3 List of Schools Accepting Applications

School Name	Track Name	Recruitment Capacity
